# Hello there!
Welcome to my
Story

Who I Am

I am Shema Placide, a Software Engineering student at AUCA in Kigali, Rwanda. My faith as a Seventh-day Adventist is central to my identity and influences my values and daily life.

I am passionate about technology and committed to using it to enhance health facilities and tackle health issues with innovative solutions.

My Heritage and Roots

I come from a rich Rwandan heritage where family, faith, and community are central values. My upbringing as a Seventh-day Adventist emphasized education, integrity, and service.

My ethnic roots reflect a strong family history of resilience and identity, deeply shaping who I am today.
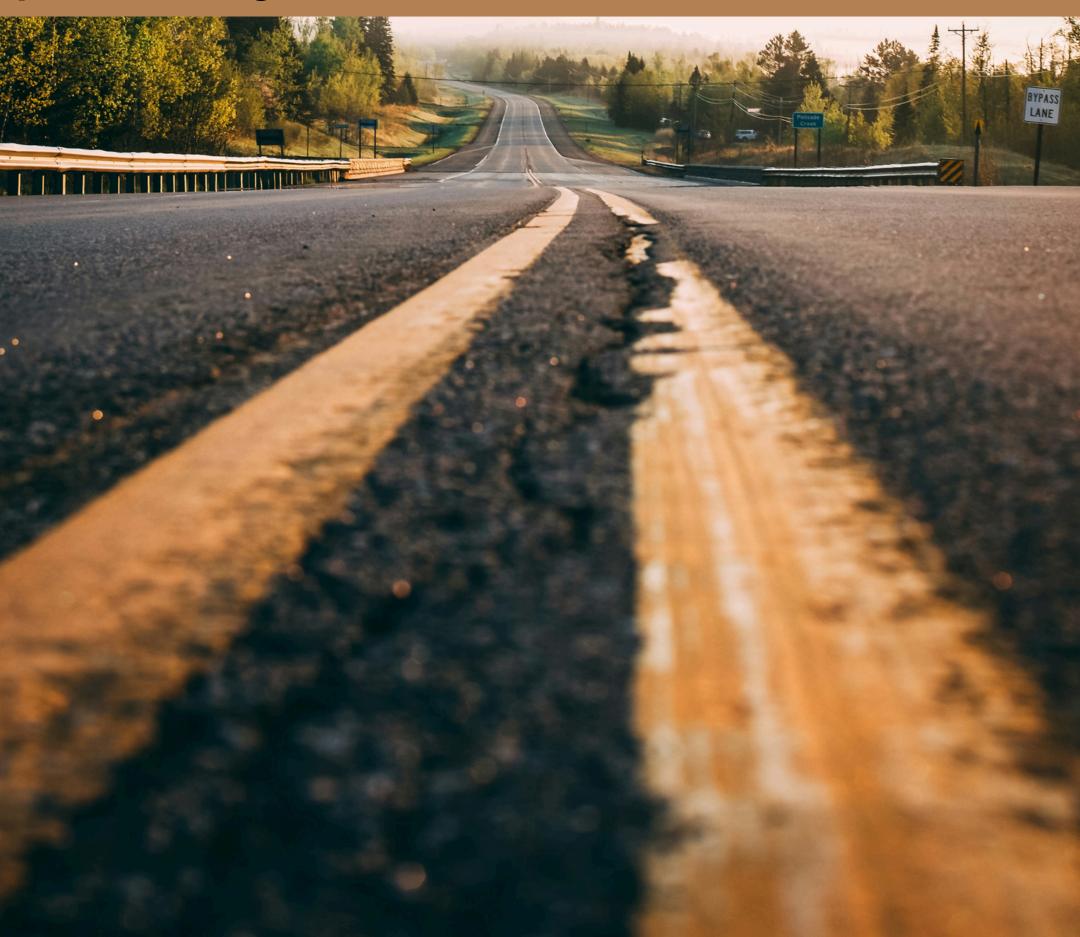

Family Stories and Traditions

My family values faith, hard work, and community. We cherish our Friday evening gatherings for family worship to welcome the Sabbath with hymns, Bible stories, and prayers.

We also visit other families regularly, strengthening our connections and community bonds. These traditions instilled in me a deep sense of belonging and spiritual grounding.

Personal Journey and Milestones

My journey has been shaped by key milestones, including excelling in my software engineering studies and pursuing a certificate in AI through ALX. These experiences have strengthened my resilience and adaptability.

Participating in community health programs has deepened my commitment to using technology and AI to drive positive changes in healthcare.

My Future Aspirations

Looking ahead, I aim to take on a leadership role where I can drive technological advancements in healthcare, focusing on improving communication within health facilities

.

Inspired by my heritage and faith, I hope to use my software engineering skills and AI knowledge to address health issues and enhance the quality of life in my community.
